Greetings!

The Health Department is now able to offer the following vaccines to persons **WITHOUT** insurance or **MEDICAID**. There is an administration fee of \$8.00 per vaccine.

- 1) **Tdap vaccine to uninsured or underinsured women over 20 weeks into their pregnancy. The ACIP recommends the Tdap vaccine for women during each of their pregnancies regardless if they were previously vaccinated.**
- 2) **Tdap vaccine to uninsured or underinsured fathers and family care providers of children less than 12 months of age. They do not need to reside in the same home. This offer, however, does not extend to daycare providers. The recipient must be a family member care provider. The baby must be born prior to this vaccine being administered.**
- 3) **Hepatitis A and/or Hepatitis B vaccines to uninsured or underinsured adults whose healthcare provider has reported them to the health department as testing positive for chronic Hepatitis B and/or Hepatitis C.**
- 4) **Hepatitis B vaccine to uninsured and underinsured adults who are household and/or intimate contacts of Hepatitis B and/or Hepatitis C positive individuals.**
- 5) **Hepatitis B vaccine to uninsured or underinsured adults who have been diagnosed with Diabetes Type 1 or Type 2. These adults must bring in a statement of the diagnosis signed by the healthcare provider on the provider's letterhead or prescription.**

Interested clients need to call to schedule an appointment at 385-3831.
